“We are not a catalog, we’re engineers.”

Carlson-Diamond & Wright, Inc.

Drive Systems Integrators

Carlson-Diamond & Wright, Inc. was founded in 1956 as a consulting engineering firm for the automotive industry. Our company quickly grew to become the preeminent power transmission distributor in eastern Michigan. Today, we provide quality products and services to a variety of industries and customers including Automotive & Aerospace Tooling OEMs, Power Plants, Water and Wastewater Treatment Plants, Aggregate, Asphalt and Cement companies, as well as Car Washes.

The CDWdrives Difference

Our outstanding reputation is not the only reason why we are known as one of the leading industrial distributors of rotating Mechanical Power Transmission. Linear Motion, Material Handling, Motors, Bearings and Pumps, it's also the fact that we are not catalog salespeople, we're engineers. We have a highly trained and experienced technical staff backed by a team of engineers. From application engineering to reverse engineering, CDWdrives is dedicated to providing premium products and exceptional support services. We not only take the time to understand the problems that our customers are trying to solve with their purchases; we recommend the best solutions, and we stand by our recommendations.

The Industries We Serve

Automotive/Aerospace Tooling

Aggregate, Asphalt and Cement

Warehousing

Automated Guided Vehicles (AGVs)

Automation Partner: Since the 1950s, CDWdrives has been a strong partner to the manufacturers of automated equipment, combining our engineering support with the best power transmission and motion components in the industry. From “off-the-shelf” solutions to completely custom designs, we have the experience and expertise to provide the right solution for your application. As a distributor we have access to a wide array of products to meet your needs, but we pride ourselves in being more than just a distributor. The ability to combine our engineering expertise with these products makes us a truly unique partner. CDWdrives stands behind everything we sell. Contact CDWdrives today to see how and why many OEMs consider us their trusted partner.

We are pleased to have the ability and consider it a privilege to serve a wide range of industries. Being able to problem solve alongside many different talented people results in growing our knowledge base all the time. This helps keep us relevant and up to date in what we do and everything that we can do for you. We are not afraid to take on any project and will work diligently with you any way that we can.

Lunch and Learn Programs

We understand that engineers, buyers and managers of busy companies are under a lot of pressure to get their jobs done and often do not have time to meet with vendors. We are sensitive to this and also recognize that they are always interested in learning about new products and innovative solutions. Our answer to this concern is to offer "Lunch and Learn" meetings. Everyone's got to eat. Let us bring in lunch, and your team can eat while we share the advantages of partnering with CDWdrives!

The North American Distributor for Metalrota

Differentials

Gearmotors

Metalrota specializes in manufacturing drive units, differentials, gearmotors and low-voltage electric motors for battery-powered vehicles. Metalrota offers DC, AC Induction and Synchronous PMS motors for voltages between 12 and 96V.

From Mines to Planes – and Everything In Between

Wherever shafts rotate, you'll find RINGFEDER POWER TRANSMISSION. Our broad range of locking devices and couplings will solve your most demanding shaft connection problems – wherever they happen to be.

- **Heavy-duty Shaft Couplings** for power generation, metal manufacturing and renewable energy.
- **Shrink Discs and Locking Assemblies** for energy, mining and heavy industry.
- **Servo-Insert and Metal Bellows Couplings** for aerospace, motion control, packaging and more.

49 YEARS OF MAXIMIZING UPTIME

Cat Pumps produces the longest-lasting, most dependable high-pressure triplex pumps on the market. The surest way to maintain production is to specify Cat Pumps.

- 100 to 10,000 psi (6.9 to 689 bar)
- 0.13 to 240 gpm (0.49 to 908 lpm)

When it needs to run, make it Cat Pumps.

Engineering Professionals: Do you ever struggle with selecting the right components for the job or lose valuable time sizing commercial components when you should be working on designing the system? Partner with CDWdrives and let us work through those details. We have experienced engineers on staff to help you through the design process. We can be an extension of your engineering department.

Maintenance Technicians: Do you have machinery that unexpectedly breaks down or a critical piece of equipment you just cannot keep running? Maybe you have machines with obsolete components, and it's only a matter of time before the inevitable happens? **CDWdrives prides itself on being a solutions provider and problem solver.** Our experienced engineers and technicians are available to diagnose problems and provide solutions. For obsolete components we can **REVERSE ENGINEER** a new solution to get you back up and running.

Reverse Engineering

Reverse Engineering is not a normal service offered by most distributors. In fact, equipment users rarely need reverse engineering services until working obsolete equipment fails and replacement parts are not available.

What do you do when a perfectly good piece of equipment goes down and can't be fixed?

The answer is simple: Call CDWdrives, and we will reverse engineer the part(s) and get your equipment up and running again.
